ASSESSMENT AND CONTROL OF BIOLOGICAL INVASION RISKS

The Paralysis Resource Guide, produced by the Christopher & Dana Reeve Foundation, is a reference and lifestyle tool for people affected by paralysis. The book includes details on medical and clinical subjects related to all causes of paralysis, as well as health maintenance information. The fully-illustrated book provides a detailed overview of biomedical research, assistive technology, sports and recreation activities, legal and civil rights, social security and benefits, and numerous lifestyle options.

Responding to the expansion of scientific knowledge about the roles of nutrients in human health, the Institute of Medicine has developed a new approach to establish Recommended Dietary Allowances (RDAs) and other nutrient reference values. The new title for these values Dietary Reference Intakes (DRIs), is the inclusive name being given to this new approach. These are quantitative estimates of nutrient intakes applicable to healthy individuals in the United States and Canada. This new book is part of a series of books presenting dietary reference values for the intakes of nutrients. It establishes recommendations for energy, carbohydrate, fiber, fat, fatty acids, cholesterol, protein, and amino acids. This book presents new approaches and findings which include the following: The establishment of Estimated Energy Requirements at four levels of energy expenditure
Recommendations for levels of physical activity to decrease risk of chronic disease

The establishment of RDAs for dietary carbohydrate and protein The development of the definitions of Dietary Fiber, Functional Fiber, and Total Fiber The establishment of Adequate Intakes (AI) for Total Fiber The establishment of AIs for linolenic and α -linolenic acids Acceptable Macronutrient Distribution Ranges as a percent of energy intake for fat, carbohydrate, linolenic and α -linolenic acids, and protein Research recommendations for information needed to advance understanding of macronutrient requirements and the adverse effects associated with intake of higher amounts Also detailed are recommendations for both physical activity and energy expenditure to maintain health and decrease the risk of disease.

This everyday guide to being a smart shopper is full of helpful tips about preventing identity theft, understanding credit, filing a consumer complaint, and more. Use the margins to make notes, write questions, or record other useful information. The information and resources you'll need are arranged as follows: Part I-Be A Savvy Consumer Read this section for advice before you make a purchase. To quickly locate specific topics and information, look in the Table of Contents and Index (p. 147). Part II-Filing a Complaint Turn to this section for suggestions on resolving consumer problems. The sample complaint letter on page 57 will help you present your case. Part III-Key Information Resources Look here for a list of public resources and contact information. Part IV-Consumer Assistance Directory Here you'll find contact information for corporate offices, consumer organizations, trade groups, government agencies, and more.

Biological invasion, an issue of growing importance due to the significant increase in international transportation and trade, can disturb the balance of local ecosystems and even destroy them. This collection of papers presented at the International Conference on Assessment and Control of Biological Invasion Risks held in August 2004 at Yokohama National University discusses risk assessment, risk management and eradication. It also includes contributions reporting on the current status of invasion and the properties of alien species in East Asia.

The book describes the recent trends in space policy and the space sector overall. While maintaining a global scope with a European perspective, it links space policy with other policy areas, highlights major events, and provides insights on the latest data. The Yearbook includes the proceedings of ESPI's 12th Autumn Conference, which discussed the growing importance of Security in Outer Space and the stakes for civilian space programmes in the public and private sectors. Bringing together

satellite operators, SMEs, European and American institutions, and think tanks, the Autumn Conference served as platform for fresh insights on security in outer space and the potential of transatlantic relations to address its challenges. The Yearbook also includes executive summaries of ESPI's work in 2017 as well as ESPI's 2017 Executive Briefs, covering topics such as suborbital spaceflight, super heavy lift launch vehicles, collaboration with China, and the delimitation of outer space. All in all, the book gives a detailed review of space policy developments worldwide, contextualised with information about national-level space industries and activity and broader political and economic conditions. The readership is expected to include the staff of space agencies, the space industry, and the space law and policy research community.

The Secret Life of Lobsters

More and more sailors and powerboaters are buying and relying on electronic and electric devices aboard their boats, but few are aware of proper installation procedures or how to safely troubleshoot these devices if they go on the blink.

Pro-life Christians, take heart: the pro-life message can compete in the marketplace of ideas-provided Christians properly understand and articulate that message. Too many Christians do not understand the essential truths of the pro-life position, making it difficult for them to articulate a biblical worldview on issues like abortion, cloning, and embryo research. The Case for Life provides intellectual grounding for the pro-life convictions that most evangelicals hold. Author Scott Klusendorf first simplifies the debate: the sanctity of life is not a morally complex issue. It's not about choice, privacy, or scientific progress. To the contrary, the debate turns on one key question: What is the unborn? From there readers learn how to engage the great bio-tech debate of the twenty-first century, how to answer objections persuasively, and what the role of the pro-life pastor should be.

Get ahead of emerging markets with top-performer picks for up-and-comers Frontier helps investors successfully navigate markets that are yet to "emerge," with expert advice on spotting opportunities and minimising risks. With first-hand insights into frontier markets as we travel with big-name fund managers from Mark Mobius to Morgan Stanley, this practical guide ranks countries, stocks and bonds on a five- to ten-year horizon to steer investors toward the most promising destinations. Written in a compelling and accessible travelogue narrative, each chapter covers a specific country, providing invaluable market analysis and a deep understanding of the political, economic, and social background of those most likely to outperform. The key focus is on fresh ideas, based on the assessments from top performing money managers when meeting challenges, hostilities or

adversity, and observations after interviewing high-level government officials and executives. With advanced economies shackled by debt and sluggish growth, investors are increasingly turning to emerging markets for better returns. Yet the money managers who came out on top in China, India, and Brazil are now focusing their attention on markets that have not yet emerged. This book applies the perspective of ten of the most successful fund managers in their field, providing an unparalleled guide to assessing investment potential in places better known for conflict, poverty and corruption. · Discover which markets have the best prospects, and which are potential disasters · Analyse individual markets by metrics including macro data, global relative value comparisons of stocks and bonds, buy/ sell triggers, and more · Learn which industries, stocks and bonds should be considered in each market · Examine each country through real-life on-the-ground assessment of corruption, conflict and other risks as well as inspirational breakthroughs that signal opportunities This is a practical manual for all investors - whether students or professionals - wanting to get to know the most promising new markets while avoiding the pitfalls. A must-read for corporate executives seeking global capital, Frontier provides a better understanding of the changing international investment dynamic. Robin Wigglesworth, FT: "Invaluable." Mark Mobius, Templeton: "I love it! Beautiful descriptive writing." Aliko Dangote, Wealthiest African: "Captivating tales, masterly woven."

Eleven Seconds into the Unknown: A History of the Hyper-X Program is a sequel to the author's first book on the X-43A/Hyper-X project, *Road to Mach 10: Lessons Learned from the X-43A Flight Research Program*. The Hyper-X program involved the efforts of numerous governmental and commercial organizations, each with its own culture, experience, and tradition. A central theme of the Hyper-X story is how these disparate groups and organizations became a unified team working toward a common goal. Making the team's task more difficult were the technological, political, and funding challenges during nearly fifty years of scramjet development.

Eleven Seconds into the Unknown: A History of the Hyper-X Program addresses these issues in compelling fashion, and will appeal to anyone interested in high-speed flight, aerospace history, the organization and management of technological projects, and the future of spaceflight.

The Strip-Built Sea Kayak: Three Rugged, Beautiful Boats You Can Build

This book addresses key questions about the materials used for the wind instruments of classical symphony orchestra such as flutes, clarinets, saxophones, oboes, bassoons and pipe organs. The content of this book is structured into four parts. Part 1- Description of materials for wind instruments deals with wood species and materials for reeds used for making clarinet, oboe and bassoon- and, with metallic materials and alloys for - horn, trumpet, trombone, etc. Auxiliary materials associated with the manufacturing of wind instruments are felt, cork, leather and parchment. Part 2- Basic acoustics of wind instruments, in which are presented succinctly, some pertinent aspects related to the physics of the resonant air column. An important aspect discussed is related to the effect of wall material on the vibration modes of the walls of wind instruments. The methods for measuring the acoustical properties of wind instruments are presented. Part 3- Manufacturing of wind instruments, describes the technology used in manufacturing metallic tubes and pipes made of wood. Part 4 - The durability and degradation of materials addresses data about methods for cleaning wind instruments, studies factors producing degradation of organ pipes, describes methods of conservation and restoration of brass instruments and of historical pipe organs. Finally, the properties of marble are described, being the only one nondegradable and sustainable material used for pipes for organs.

In this intimate portrait of an island lobstering community and an eccentric band of renegade biologists, journalist Trevor Corson escorts the reader onto the slippery decks of fishing boats, through danger-filled scuba dives, and deep into the churning currents of the Gulf of Maine to learn about the secret undersea lives of lobsters. This P.S. edition features an extra 16 pages of insights into the book, including author interviews, recommended reading, and more.

Supply Chain Management

This book gathers selected research articles from the International Conference on Innovative Product Design and Intelligent Manufacturing System (ICIPDIMS 2019), held at the National Institute of Technology, Rourkela, India. The book discusses latest methods and advanced tools from different areas of design and manufacturing technology. The main topics covered include design methodologies, industry 4.0, smart manufacturing, and advances in robotics among others. The contents of this book are useful for academics as well as professionals working in industrial design, mechatronics, robotics, and automation.

Robot Manipulator Control offers a complete survey of control systems for serial-link robot arms and acknowledges how robotic device performance hinges upon a well-developed control system. Containing over 750 essential equations, this thoroughly up-to-date Second Edition, the book explicates theoretical and mathematical requisites for controls design and summarizes current techniques in computer simulation and implementation of controllers. It also addresses procedures and issues in computed-torque, robust, adaptive, neural network, and force control. New chapters relay practical information on commercial robot manipulators and devices and cutting-edge methods in neural network control.

Although books on strip building canoes abound, this is among the first to adapt the technique to crafting attractive, functional kayaks. Using high-quality, computer-generated illustrations and photographs to explain key techniques, the book provides complete plans and measurements for three different kayaks: 1) A simple solo craft for beginners, 2) A high-performance solo kayak for intermediate paddlers, and 3) A tandem design for two paddlers. With its easy-to-follow guidance and instructions, The Strip-Built Sea Kayak makes top-notch kayaks accessible to budget-minded paddlers.

(Music Pro Guide Books & DVDs). Recording Unhinged: Creative and Unconventional Music Recording Techniques is a dare a challenge for those who think recording music should be done a certain way. Sylvia Massy, engineer, mixer, and producer of such all-time great artists as Tool, Prince, Tom Petty and the Heartbreakers, R.E.M., Oingo Boingo, Johnny Cash, Red Hot Chili Peppers, and many more, invites you to put everything you've ever known or learned about recording aside and dive head-long into the unknown. You might just find the doors blown off your conception of how great music should be recorded. If you want to take your creativity and freedom to a brand new level, open your mind and hear

the sermons that Sylvia Massy preaches! She lives in a world far outside the norm, working in ways that, though frightening to some, yield results that are emotionally powerful, incredibly personal, gut-wrenching, organic, and even (based on her iconic client list) extremely commercially successful. Recording Unhinged contains many full-color R. Crumb-style illustrations by Massy, herself! In addition to being an A-list engineer/producer, she is a gifted artist! Her illustrations depict real and imaginary sessions and recording situations so the images move beyond literal demonstrations into the root-level heart and soul of her passion for recording and music! Also, included are lists, recipes, schematics, quotes, and stories, plus Massy interviews countless industry icons who shake-it-up in the music world.

Robotics engineering has progressed from an infant industry in 1961 to one including over 500 robot and allied firms around the world in 1989. During this growth period, many robotics books have been published, so me of which have served as industry standards. Until recently, the design of robotics systems has been primarily the responsibility of the mechanical engineer, and their application in factories has been the responsibility of the manufacturing engineer. Few robotics books address the many systems issues facing electronics engineers or computer programmers. The mid-1980s witnessed a major change in the robotics field. The development of advanced sensor systems (particularly vision), improvements in the intelligence area, and the desire to integrate groups of robots working together in local work cells or in factory-wide systems have greatly increased the participation of electronics engineers and computer programmers. Further, as robots gain mobility, they are being used in completely new areas, such as construction, firefighting, and underwater exploration, and the need for computers and smart sensors has increased. Fundamentals of Robotics Engineering is aimed at the practicing electrical engineer or computer analyst who needs to review the fundamentals of engineering as applied to robotics and to understand the impact on system design caused by constraints unique to robotics. Because there are many good texts covering mechanical engineering topics, this book is limited to an overview of those topics and the effects they have on electrical design and system programs.

This book constitutes the refereed proceedings of the Third International Conference on Simulation, Modeling, and Programming for Autonomous Robots,

SIMPAR 2012, held in Tsukuba, Japan, in November 2012. The 33 revised full papers and presented together with 3 invited talks were carefully reviewed and selected from 46 submissions. Ten papers describe design of complex behaviors of autonomous robots, 9 address software layers, 8 papers refer to related modeling and learning. The papers are organized in topical sections on mobile robots, software modeling and architecture and humanoid and biped robots.

The aim of this book, with its superb step by step photographs and detailed diagrams is to enable every owner to understand the workings of an outboard motor (2 or 4 stroke) and be able to fix it with relative ease. It includes: an explanation of the different parts that make up the engine and how they interact; how fuel is transformed into propulsion; regular maintenance and repair worksheets to help even the most mechanically ignorant to work on their outboard engine with confidence; the most common causes of breakdown; troubleshooting tables to allow you to diagnose and fix the most common engine problems and advice on how to winterize your outboard in one short afternoon. After reading this book, your outboard will no longer be a potential bother to you but an ally for better boating.

This book explains supply chain management (SCM) using the

strategy-structure-process-performance (SSPP) framework. Utilizing this well-known framework of contingency theory in the areas of strategic management and organizational design, SCM is firmly positioned among management theories. The author specifically proposes a theoretical foundation of SCM that will be relevant to such areas as operations management, logistics management, purchasing management, and marketing. Both the static and dynamic sides of SCM are reported. On the static side, supply chain strategies are divided into three patterns: efficiency-oriented, responsiveness-oriented, and the hybrid efficiency- and responsiveness-oriented pattern. For each strategy, suitable internal and external supply chain structures and processes are proposed. On the dynamic side, the big issue is to overcome performance trade-offs. Based on theories of organizational change, process change, and dynamic capabilities, the book presents a model of supply chain process change. On structure, the focus is on the role of an SCM steering department. Illustrative cases are included from such diverse industries as automobiles (Toyota and Nissan), personal computers (Fujitsu), office equipment (Ricoh), air-conditioning (Daikin), tobacco (Japan Tobacco), chemicals and cosmetics (Kao), and casual fashion (Fast Retailing and Inditex). The strategy and organization of SCM is systematically presented on the basis of the SSPP framework. In particular, the relationships among three management elements—strategy, structure, and process—can be identified in an SCM context. From many of the cases contained in this volume, there emerges an understanding of how to analyze the success and failure factors of SCM using the SSPP framework. In addition, the reader sees not only the static side SCM such as process operation but also its dynamic side such as process innovation and process improvement.

The thoraco-abdominal aortic pathology is not uncommon and represents the ultimate challenge for vascular surgeons. The book deals with the newest endovascular and hybrid approaches, together with more traditional surgical strategies. Written by internationally renowned experts in vascular and cardiac surgery, anesthesiology and radiology, the volume provides a very practical approach to the main problems encountered from diagnosis to postoperative care: general principles of aortic diseases, imaging techniques, surgical and anesthesiologic strategies and techniques and other specific problems are some of the topic dealt with. Numerous pictures illustrate the most important diagnostic findings and depict key techniques and strategies. Vascular and cardiac surgeons, anesthesiologists, perfusionists and radiologists will find in this volume useful and updated information for the treatment of this very challenging condition.

Now the standardisation work of DAB (Digital Audio Broadcasting) system is finished many broadcast organisations, network providers and receiver manufacturers in European countries and outside of Europe (for example Canada and the Far East) will be installing DAB broadcast services as pilot projects or public services. In addition some value added services (data and video services) are under development or have already started as pilot projects. The new digital broadcast system DAB distinguishes itself from existing conventional broadcast systems, and the various new international standards and related documents (from ITU-R, ISO/IEC, ETSI, EBU, EUREKA147, and others) are not readily available and are difficult to read for users. Therefore it is essential that a well structured technical handbook should be available. The Second Edition of Digital Audio Broadcasting has been fully updated with new sections and chapters added to reflect all the latest developments and advances. Digital Audio Broadcasting: Provides a fully updated comprehensive overview of DAB Covers international standards, applications and other technical issues Combines the expertise of leading researchers in the field of DAB Now covers such new areas as: IP-Tunneling via DAB; Electronic Programme Guide for DAB; and Metadata A comprehensive overview of DAB specifically written for planning and system engineers, developers for professional and domestic equipment manufacturers, service providers, as well as postgraduate students and lecturers in communications technology.
