Mind-opening writing on what kids need from school, from one of education's most outspoken voices. Almost no writer on schools asks us to question our fundamental assumptions about education and motivation as boldly as Alfie Kohn. The Washington Post says that "teachers and parents who encounter Kohn and his thoughts come away transfixed, ready to change their schools." And Time magazine has called him "perhaps the country's most outspoken critic of education's fixation on grades [and] test scores." Here is challenging and entertaining writing on where we should go in American education, in Alfie Kohn's unmistakable voice. He argues in the title essay with those who think that high standards mean joylessness in the classroom. He reflects thoughtfully on the question "Why Self-Discipline Is Overrated." And in an essay for the New York Times, which generated enormous response, he warns against the dangers of both punishing and praising children for what they do instead of parenting "unconditionally." Whether he's talking about school policy or the psychology of motivation, Kohn gives us wonderfully provocative—and utterly serious—food for thought.

This new book will be greeted with enthusiasm by his many readers, and by teachers and parents seeking a refreshing perspective on today's debates about kids and schools.

Coaches play a major role in helping people understand their values and the values of their surroundings and helping them make choices and adapt. Sometimes the choice may be to find a situation more in sync with your values. Or it may mean working hard on yourself or in concert with your partner, team, or organization. Whatever we need to do to attain it, a positive fit makes for a happier

person, and a happier person will be more successful. This accessible and practical book will help coaches, educators, leaders, and managers understand the philosophy, methodology, and tools that can be used to make a person happier, healthier, and more productive at work and in life in general. This book compiles short vignettes from over a dozen global academics and celebrated executive coaches, sharing information about aligning values in different settings. Based on years of research and written for readers from all walks of life, you will learn that when you understand your core values, place them on a triaxial template, and align them with your definition of success, everything changes. It will help you come out of your comfort zone in order to embrace the future and enhance the quality of your life. For this, you need a concept, a methodology, and effective tools, all of which are offered in this book. Rich with practical step-by-step methodologies and tools to facilitate values-led leadership, coaching, and mentoring, this book is essential for any change agent, be it a coach, a leader, an educator, or any person who is interested in learning how to become more effective, improve their practice, and engage in self or professional coaching. At the same time, it will enhance leadership qualities.

Welcome to the world of urban police legend and lore. Homicidal Humor offers a glimpse of life through the eyes of a homicide detective, whose ability to see the funnier side of tragedy has helped keep him sane. These fictional short stories, inspired by real cops and real cases, are set in areas along the Texas Gulf Coast and include historical facts and interesting tidbits

about the city of Houston and its police department. All individuals, as well as locations alluded to, are fictitious. You might say the names have been changed to protect the imbeciles. Note: This book contains adult language. From the Author: "As a rookie cop I learned that idiots were put on this earth for our entertainment. I was taught not to take personally those things that street animals said or did. You must actively seek out humor, because if you internalize what you see, it will eat you alive. In this book I have attempted to expose both the humor and the reality I observed as the unwashed wallowed in the mud, the blood, and the beer." What fans are saying about More Homicidal Humor: "Being a trained investigator, I've determined the author of this book is the real deal. His stories, while generally humorous, reveal a side of the criminal element that the media rarely thinks you need to see. It's a reminder of why you should keep a sense of humor, and also own a gun. Jesse Jackson probably won't buy a copy of this book, but you ought to." --Sheriff Jim Wilson, Handgun Editor, Shooting Times "It's like having an old Irish cop tell you 'Now, Lad, let me tell you what really happened out there.'" --Sergeant Brent Boren, Houston P.D. (ret) "Welcome to the real world. Pure fiction based on nothing but the facts. Things Mom never told you about." --Sergeant R. L. Pagel, Houston P.D. Westside Command From More Homicidal Humor: Poor Grandma This scene took place in a cemetery. It was a clear, hot and dry-blast furnace kind of central Texas mid-summer day. It was almost noontime. The flag-draped coffin was still above ground and the preacher was coming to the end of his graveside service. He was going through the Dust to dust, ashes

to ashes routine that everybody and their dog knows was wrapping up the show. The dead man was a decorated military veteran. The immediate family sat upon folding chairs and they had been seated under a canvas awning set up for shade. The dead man's aged sister sat on the front row at the far end. Beside her sat a rather angelic looking little girl about seven to eight years old. The child was holding a purse in her lap and wearing ruffled white socks and black Mary Jane shoes. At the end of the ceremony a group of men from the local VFW chapter moved forward and gave the 21-gun salute. At this point the old woman became overcome by either the heat, emotion, grief or a combination of all three. She fainted dead away and passed out-slumping onto the ground. For a moment nobody moved and there was complete silence. Then the angelic-looking little girl sitting next to her blurted out, "God Damn-they done shot Grandma!" Uncle Bob sure as hell would have approved and could not have orchestrated it any better himself.

Delta Scout was the call sign for Tony Trethowan's Ground Coverage 'stick' during the Rhodesian bush war of the late seventies. This is the story of an ordinary policeman, a young man who signed up with the British South Africa Police as a raw 18 year old and who was to serve eight years with that fine force. As a young Patrol Officer, he was to experience rural life in remote stations in the bush of Matabeleland. He embraced the experience and learned Sindebele

within a few months. The book is richly interspersed with anecdotes of wild frontier life -- of rowdy prospectors, obstreperous farmers, maverick hunters and bizarre eccentrics. He deals with a wide array of crimes and incidents -- from murder, tribal suicide, sorcery, robbery and drunkenness to horrific vehicle accidents. But as the bush war intensifies, Tony finds himself more and more involved in paramilitary operations. Ground Coverage was a BSAP intelligence-gathering unit -- operating literally 'on the ground' in the rural areas. Known by his enemy, Nkomo's ZIPRA guerrillas, as Baleka, or 'he who runs hither and thither' because of his propensity for rapidly covering vast areas, alone in his beaten-up police Land Rover, the second part of the book deals with the author's conversion from civilian policeman to full-blooded counter-insurgency operator in an African guerrilla war. Told with a sensitivity and pathos that is rare in military memoirs, Delta Scout is a brutally honest, compelling account of innocence lost.

Wave propagation is an important topic in engineering sciences, especially, in the field of solid mechanics. A description of wave propagation phenomena is given by Graff [98]: The effect of a sharply applied, localized disturbance in a medium soon transmits or 'spreads' to other parts of the medium. These effects are familiar to everyone, e.g., transmission of sound in air, the spreading of ripples on a pond of water, or the transmission of radio waves. From all wave types in nature, here, attention

is focused only on waves in solids. Thus, solely mechanical disturbances in contrast to electromagnetic or acoustic disturbances are considered. of waves - the compression wave similar to the In solids, there are two types pressure wave in fluids and, additionally, the shear wave. Due to continual reflections at boundaries and propagation of waves in bounded solids after some time a steady state is reached. Depending on the influence of the inertia terms, this state is governed by a static or dynamic equilibrium in frequency domain. However, if the rate of onset of the load is high compared to the time needed to reach this steady state, wave propagation phenomena have to be considered.

The VitalBook e-book version of Genomes 3 is only available in the US and Canada at the present time. To purchase or rent please visit <http://store.vitalsource.com/show/9780815341383> Covering molecular genetics from the basics through to genome expression and molecular phylogenetics, Genomes 3 is the latest edition of this pioneering textbook. Updated to incorporate the recent major advances, Genomes 3 is an invaluable companion for any undergraduate throughout their studies in molecular genetics. Genomes 3 builds on the achievements of the previous two editions by putting genomes, rather than genes, at the centre of molecular genetics teaching. Recognizing that molecular biology research was being driven more by genome sequencing and functional analysis than by

research into genes, this approach has gathered momentum in recent years.

CHILI HOT GMAT MATH REVIEW will help readers develop the skills and mindset needed to score high on the quantitative section of the GMAT exam. Each hand-selected problem comes with a Classification, Snapshot, and Chili Rating. Classification serves to identify each problem according to category or sub-category. Snapshot highlights why that particular problem was chosen, including the underlying problem-solving principle or strategic approach. Chili Rating helps candidates gauge the estimated difficulty level of a given problem. A single chili indicates that the estimated difficulty level of a given problem is "mild" (500 to 590 difficulty level), two chilies spell "hot" (600 to 690 difficulty level), and three chilies signal "very hot" (700 or above difficulty level). By studying problems of varying difficulty, candidates will learn to maintain discipline on easy but tricky math problems and also to exercise flexibility when deciding on multiple approaches and time-saving shortcuts for use in tackling harder, more involved problems. Note to readers: This book contains the excerpted math sections from the parent title "Chili Hot GMAT: 200 All-Star Problems to Get You a High Score on Your GMAT Exam."

The term ‘cityscaping’ is here introduced to characterise the creative process through which the image of the city is created and represented in various media—text, film and artefacts. It thus turns attention away from built urban spaces and onto mental images of cities. One focus is on the question

of which literary, visual and acoustic means prompt their recipients' spatial imagination; another is to inquire into the semantics and functions that are ascribed to the image of a city as constructed in various media. The examples of ancient texts and works of art, and modern literature and films, are used to elucidate the artistic potential of images of the city and the techniques by which they are semanticised. With its interdisciplinary approach, the volume for the first time makes clear how strongly mental images of urban space, both ancient and modern, have been shaped by the techniques of their representation in media.
