"Entertainers and trainers have a lot in common. Both require an audience. Both require a polished, professional delivery. And both must attract -- and keep -- attention. Or else the show is over. Unlike the audience at a show, training participants are often disinterested and easily distracted. In order to keep them tuned in and help them retain information, trainers are constantly in search of new ways to engage learners. Grounded in the latest adult learning and training theories, "Show Biz Training" provides creative techniques that use comedy, props, magic, theater, and music, giving readers all the tools they need to perform the many activities found inside. The book uses specific examples and provides step-by-step instructions, resource lists, and worksheets to help trainers support and further learning by engaging emotion, building rapport, creating the proper atmosphere, and crafting lessons out of a host of entertainment-inspired ideas. Packed with fun, original concepts for serious educators, "Show Biz Training" is a highly informative way to set the stage for exciting, effective learning."

On the day of her father's funeral, twenty-eight-year-old Clarissa Iverton

discovers that he wasn't her biological father after all. Her mother disappeared fourteen years earlier, and her fiancé has just revealed a life-changing secret to her. Alone and adrift, Clarissa travels to mystical Lapland, where she believes she'll meet her real father. There, at a hotel made of ice, Clarissa is confronted with the truth about her mother's history, and must make a decision about how—and where—to live the rest of her life.

Designed specifically for undergraduate writing, this easy-to-use pocket guide provides complete guidance for new writers on effective, clear, and inclusive scholarly communication and the essentials of formatting papers and other course assignments.

Research Methods for Public Administrators contains a thorough overview of research methods and statistical applications for advanced undergraduate and graduate students, and practitioners. The material is based on established social science methods. Concepts and applications are discussed and illustrated with examples from actual research. The book covers research design, methods of data collection, instructions on formulating research plans, measurement, sampling procedures, and statistical applications from basic statistics to more advance techniques. The basics of conducting experiments, survey research, case studies, and focus groups are discussed. Data organization, management,

and analysis are also covered, as are data analysis and hypothesis testing. Descriptive and inferential statistics are discussed and illustrated with examples. The book also includes a chapter on obtaining and analyzing secondary data (data already collected for other purposes) and a chapter on reporting and presenting research results to a variety of audiences. This is a general textbook written primarily for students of public administration and practitioners in public and not-for-profit organizations. It includes materials shown to be useful in gathering and assessing information for making decisions and implementing policies. The material is discussed at a level to be accessible and with enough detail to be useful. New to the seventh edition: Additional and expanded material on qualitative research, big data, metadata, literature reviews, and causal inference New material on experiments and experimental research New examples and case studies, including those dealing with public policy Expanded material on using computers for data management Information on new NSF and NIH ethics and protection of human subjects requirements for researchers New data sets and Power Point slides for each chapter.

“Should be read by anyone interested in understanding the future,” The Times Literary Supplement raved about the original edition of *The Social Life of Information*. We’re now living in that future, and one of the seminal books of the

Internet Age is more relevant than ever. The future was a place where technology was supposed to empower individuals and obliterate social organizations. Pundits predicted that information technology would spell the end of almost everything—from mass media to bureaucracies, universities, politics, and governments. Clearly, we are not living in that future. The Social Life of Information explains why. John Seely Brown and Paul Duguid show us how to look beyond mere information to the social context that creates and gives meaning to it. Arguing elegantly for the important role that human sociability plays, even—perhaps especially—in the digital world, *The Social Life of Information* gives us an optimistic look beyond the simplicities of information and individuals. It shows how a better understanding of the contribution that communities, organizations, and institutions make to learning, working, and innovating can lead to the richest possible use of technology in our work and everyday lives. With a new introduction by David Weinberger and reflections by the authors on developments since the book's first publication, this new edition is essential reading for anyone seeking to understand the human place in a digital world. Siegel and Welsh's *CORE* presents theory, policy, and the latest research in one value-priced, student-friendly paperback! Reinforced concrete has the potential to be very durable and capable of withstanding a variety of adverse environmental conditions. However, failures in the structures do still occur as a result of premature reinforcement corrosion. In this authoritative book the fundamental aspects of this complex process are analysed; focusing on corrosion of the reinforcing steel, and looking particularly, at new scientific and technological developments. Monitoring techniques, including the newly developed online-monitoring, are examined, as well as the numerical methods used to simulate corrosion and perform parameter studies. The influence of composition and microstructure of concrete on corrosion behaviour is explored. The second

The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar

Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

This volume pulls together research on several aspects of the self. One set of chapters deals with the importance of building a self based on authenticity and "Who I really am."; a second group deals with the ways in which we defend views of the self as positive and powerful; a third group is concerned with multiple aspects of self regulation. Each of the chapters is a well-written, non-technical description of an important, currently active research program.

From the author of *The Ice Master* comes the remarkable true story of a young Inuit woman who survived six months alone on a desolate, uninhabited Arctic island. In September 1921, four young men and Ada Blackjack, a diminutive 25-year-old Eskimo woman, ventured deep into the Arctic in a secret attempt to colonize desolate Wrangel Island for Great Britain. Two years later, Ada Blackjack emerged as the sole survivor of this ambitious polar expedition. This young, unskilled woman--who had headed to the Arctic in search of money and a husband--conquered the seemingly unconquerable north and survived all alone.

after her male companions had perished. Following her triumphant return to civilization, the international press proclaimed her the female Robinson Crusoe. But whatever stories the press turned out came from the imaginations of reporters: Ada Blackjack refused to speak to anyone about her horrific two years in the Arctic. Only on one occasion--after charges were published falsely accusing her of causing the death of one her companions--did she speak up for herself. Jennifer Niven has created an absorbing, compelling history of this remarkable woman, taking full advantage of the wealth of first-hand resources about Ada that exist, including her never-before-seen diaries, the unpublished diaries from other primary characters, and interviews with Ada's surviving son. Ada Blackjack is more than a rugged tale of a woman battling the elements to survive in the frozen north--it is the story of a hero.
