NY Times best-selling author Dr. Michael Roizen reveals how the food choices you make each day--and when you make them--can affect your health, your energy, your sex life, your waistline, your attitude, and the way you age. What if eating two cups of blueberries a day could prevent cancer? If drinking a kale-infused smoothie could counteract missing an hour's worth of sleep? When is the right time of day to eat that chocolate chip cookie? And would you actually drink that glass of water if it meant skipping the gym? This revolutionary guide reveals how to use food to enhance our personal and professional lives--and increase longevity to boot. What to Eat When is not a diet book. Instead, acclaimed internist Michael Roizen and preventive medicine specialist Michael Crupain offer readers choices that benefit them the most--whether it's meals to help them look and feel younger or snacks that prevent diseases--based on the science that governs them.

'A must-read ... satisfying, rich ... loaded with flavour' Sunday Telegraph This book is a celebration of food. By food, Michael Pollan means real, proper, simple food - not the kind that comes in a packet, or has lists of unpronounceable ingredients, or that makes nutritional claims about how healthy it is. More like the kind of food your great-grandmother would recognize. In Defence of Food is a simple invitation to junk the science, ditch the diet and instead rediscover the joys of eating well. By following a few pieces of advice (Eat at a table - a desk doesn't count. Don't buy food where you'd buy your petrol!), you will enrich your life and your palate, and enlarge your sense of what it means to be healthy and happy. It's time to fall in love with food again. For the past twenty years, Michael Pollan has been writing about the places where the human and natural worlds intersect: food, agriculture, gardens, drugs,

Results from the National Research Council's (NRC) landmark study *Diet and health* are readily accessible to nonscientists in this friendly, easy-to-read guide. Readers will find the heart of the book in the first chapter: the Food and Nutrition Board's nine-point dietary plan to reduce the risk of diet-related chronic illness. The nine points are presented as sensible guidelines that are easy to follow on a daily basis, without complicated measuring or calculating--and without sacrificing favorite foods. *Eat for Life* gives practical recommendations on foods to eat and in a "how-to" section provides tips on shopping (how to read food labels), cooking (how to turn a high-fat dish into a low-fat one), and eating out (how to read a menu with nutrition in mind). The volume explains what protein, fiber, cholesterol, and fats are and what foods contain them, and tells readers how to reduce their risk of chronic disease by modifying the types of food they eat. Each chronic disease is clearly defined, with information provided on its prevalence in the United States. Written for everyone concerned about how they can influence their health by what they eat, *Eat for Life* offers

Nutrition expert David Zinczenko—the New York Times bestselling author of the *Abs Diet* series, *Eat This, Not That!* series, and *Eat It to Beat It!*—has spent his entire career learning about belly fat—where it comes from and what it does to us. And what he knows is this: There is no greater threat to you and your family—to your health, your happiness, even your financial future. Yes, you can: Change your destiny. Overcome your fat genes. Strip away belly fat

and finally attain the lean, strong, healthy body you've always wanted. With Zero Belly Diet, David Zinczenko reveals explosive new research that explains the mystery of why some of us stay thin, and why some can't lose weight no matter how hard we try. He explains how some foods turn our fat genes on—causing seemingly irreversible weight gain—and uncovers the nine essential power foods that act directly on those switches, turning them to “off” and allowing for easy, rapid, and sustainable weight loss. And he shows how these foods help heal your digestive system, keeping those gene switches turned off and setting you up for a lifetime of leanness. Other diets can help you lose weight, but only the Zero Belly diet attacks fat on a genetic level, placing a bull's-eye on the fat cells that matter most: visceral fat, the type of fat ensconced in your belly. These fat cells act like an invading army, increasing inflammation and putting you at risk for diabetes, Alzheimer's, arthritis, heart disease, and cancer. Visceral fat can also alter your hormone levels, erode muscle tissue, increase your chances of depression, and destroy your sex drive. But you can turn the odds in your favor. Zero Belly Diet shows you how to deactivate your fat genes, rev up your metabolism, banish bloat, and balance your digestive health, allowing you to easily build lean, strong stomach muscle and strip away unwanted belly fat without sacrificing calories or spending hours at the gym. The result: weight loss that is easier, faster, more lasting, and more delicious than you'd ever imagine. You'll be stunned and inspired by the results of an amazing 500-person test panel—men and women who lost weight quickly, and with ease, following the Zero Belly diet. From the physician behind the wildly popular NutritionFacts website, How Not to Die reveals the groundbreaking scientific evidence behind the only diet that can prevent and reverse many of the causes of disease-related death. The vast majority of premature deaths can be prevented through simple changes in diet and lifestyle. In How Not to Die, Dr. Michael Greger, the internationally-renowned nutrition expert, physician, and founder of NutritionFacts.org, examines the fifteen top causes of premature death in America—heart disease, various cancers, diabetes, Parkinson's, high blood pressure, and more—and explains how nutritional and lifestyle interventions can sometimes trump prescription pills and other pharmaceutical and surgical approaches, freeing us to live healthier lives. The simple truth is that most doctors are good at treating acute illnesses but bad at preventing chronic disease. The fifteen leading causes of death claim the lives of 1.6 million Americans annually. This doesn't have to be the case. By following Dr. Greger's advice, all of it backed up by strong scientific evidence, you will learn which foods to eat and which lifestyle changes to make to live longer. History of prostate cancer in your family? Put down that glass of milk and add flaxseed to your diet whenever you can. Have high blood pressure? Hibiscus tea can work better than a leading hypertensive drug—and without the side effects. Fighting off liver disease? Drinking coffee can reduce liver inflammation. Battling breast cancer? Consuming soy is associated with prolonged survival. Worried about heart disease (the number 1 killer in the United States)? Switch to a whole-food, plant-based diet, which has been repeatedly shown not just to

prevent the disease but often stop it in its tracks. In addition to showing what to eat to help treat the top fifteen causes of death, *How Not to Die* includes Dr. Greger's Daily Dozen - a checklist of the twelve foods we should consume every day. Full of practical, actionable advice and surprising, cutting edge nutritional science, these doctor's orders are just what we need to live longer, healthier lives.

Everyone says, when you're pregnant, you're eating for two. But I wrote this book because I want to change that thinking. I want you to eat for you. What do I mean by that? My patients know. As an OB/GYN with a full-time practice—not to mention in my roles as Chief Women's Health Correspondent at ABC News, and as co-host of *The Doctors*—it's my mission to deliver the most accessible, up-to-date and action-able information to ensure you stay healthy during your pregnancy, and deliver a beautiful, bouncy bundle of joy at the end. (And I've delivered more than 1,500 of them!) That means you'll need to know the essential vitamins and key nutrients your little one needs to grow, and which foods stave off defects, gestational diabetes, and other complications. And it means you should ask your OB/GYN or midwife to join you in learning, so

you can work together to control your nutrition. With 66% of reproductive-age women overweight or obese, the need to combat unhealthy and uninformed eating is a responsibility we all share. But “eating for you” also means being practical. Because I know you’re more than just a mom-to-be. You’re a mom-to-be who’s got a thousand other jobs, from career woman to budding chef to amateur yogi to professional Pinstagammer and possibly, maybe, if you have 5 minutes left, wife (and perhaps you’re a mom already, in which case, you know what I mean). No matter how you spend your time, chances are you don’t have much of it—and certainly don’t want to spend the next nine months measuring the folate counts in every box of cereal, or starving on your next road trip because Burger King doesn’t serve kale. You need nutrition. And you need it now. And although cooking your own food is the surest way to maintain a healthy diet, you probably can’t do so every day for the next nine months. That’s why I wrote *Eat This, Not That! When You’re Expecting*, the only book of its kind by a doctor qualified to talk about nutrition, physiology, and disease—who will also tell you what to do the next time you’re at the salad bar, in the yogurt aisle, or at Mickey D’s. Because, let’s be honest, momma’s gonna crave a little Mickey D’s. And she’s going to need clean energy, too. That’s why I’ll also tell you how delicious wild salmon, fresh and creamy

In this national bestseller based on Harvard Medical School and Harvard School of Public Health research, Dr. Willett explains why the USDA guidelines--the famous food pyramid--are not only wrong but also dangerous.

"Investigative journalist Barry Estabrook was often on the receiving end of his doctor's scowl. Realizing he had two options--take more medication or lose weight--Estabrook chose the latter, but was paralyzed by the options. Which diet would keep the weight off? What program could he maintain over time? What diet works best--or even at all? Over the course of three years, Estabrook tried the regimens behind the most popular diets of the past forty years--from paleo, keto, gluten-free, and veganism to the Master Cleanse, Whole30, Atkins, Weight Watchers--examining the people, claims, and science behind the fads, all while recording his mental and physical experience of following each one. Along the way, he discovered that all the branded programs are derived from just three diets. There are effective, scientifically valid takeaways to

be cherry-picked . . . and the rest is just marketing. Perhaps most alarming, Estabrook uncovered how short-term weight loss can do long-term health damage that may go undetected for years.

Estabrook contextualizes his reporting with an analysis of our culture's bizarre dieting history, dating back to the late 1800s, to create a thorough--and thoroughly entertaining--look at what specific diets do to our bodies, why some are more effective than others, and why our relationship with food is so fraught."--Provided by publisher.

free? Keto or Mediterranean? Fasting or Paleo? Every day we hear about a new ingredient that is good or bad, a new diet that promises everything. Our conversations are filled with a dizzying array of approaches to and perspectives on our relationship with food. But the truth is that none of those labels matter. The secret to becoming healthier, losing weight, living a pain-free and energetic life and healing the planet has nothing to do with counting calories, reducing portion sizes or feeling deprived - the key is re-learning how to eat like a human. This means finding food that is as nutrient-dense as possible, and preparing that food using methods that release those nutrients and make them safe and bioavailable to our bodies, which is exactly what allowed our ancestors, millions of years ago, to not only live but thrive. In *Eat Like a Human*, archaeologist and primitive technologist Dr Bill Schindler draws on cutting-edge science and a lifetime of research to explain how safety, nutrient density and bioavailability are the cornerstones of a healthy diet. He shows readers how to live like modern 'hunter-gatherers' by using the same strategies our ancestors used - as well as techniques still practiced by many cultures around the world - to make food as safe, nutritious, bioavailable and delicious as possible. With each chapter dedicated to a specific food group, in-depth explanations of different foods and cooking

NBC Today show nutrition and diet guru Madelyn Fernstrom and award-winning neuroscientist and pharmacologist John Fernstrom —partnering with AARP— present the ultimate guide to food and medicine interaction. Millions of Americans take prescription drugs to treat diabetes, high blood pressure, heart disease, or other conditions. But beware: The foods you eat and the medications you take could be working against each other. *Don't Eat This If You're Taking That* takes the mystery out of food and medication interactions. This easy-to-use guide details foods that can interfere with the action of the medication—whether taken for the short or long term. In this book, readers can easily find a medication, see what foods to avoid, and make smart swaps. We all believe a diet rich in colorful fruits and vegetables, lean proteins, whole grains, and low-fat dairy products is part of healthy eating—right? Not always. Dr. Fernstrom explains exactly what foods to avoid when and why. For instance, If you're taking cholesterol medicine, you should cut out—or cut down on—grapefruit. On a blood thinner? Avoid dark green veggies. If you're on thyroid medication, nix the soy. And more small diet changes with big health payoffs! As an added bonus,
