Today most employee learning happens during unstructured on-the-job experiences, social interactions, and while perusing informal learning sources. The challenge for organizations is tracking and reporting on all of this learning in a consistent, reliable way. A great way to do this is by using the new learning technology specification, the Experience API (xAPI), which allows learning content and systems to speak to each other to record and track all types of learning experiences. In this Infoline, you will learn how and why the xAPI has emerged as the next-generation learning standard how to implement xAPI in your organization the benefits and challenges of xAPI how to select appropriate training systems how to assess your organization's readiness for this software standard. This Infoline also includes use cases to help you solve problems you may be experiencing in managing organizational learning, and to help you find new ways to support various types of learning experiences.

This book consists of edited versions of the papers delivered at the Institute of International Shipping and Trade Law's 11th International Colloquium, held at Swansea Law School in September 2015. Featuring a team of contributors at the top of their profession, both in practice and academia, these papers have been carefully co-ordinated so as to ensure to give the reader a first class insight into the issues surrounding international sale and carriage contracts. The book is set out in three parts: Part I offers a detailed and critical analysis on emerging issues and unresolved questions in international sales and the carriage contracts affected to facilitate such sales. Part II critically and thoroughly analyses the legal issues that often arise in the context of security over goods, letters of credit and similar documents. Part III is dedicated to a critical and up-to-date discussion on matters concerning cargo insurance in this context. With its breadth of coverage and high-quality analysis, this book is vital reading for both professional and academic readers with an interest in international trade and carriage of goods.

Brannick and Levine provide students and professionals in management and I/O psychology with the methods and applications of job analysis. Job Analysis covers a host of activities, all directed toward discovering, understanding, and describing what people do at work. It thus forms the basis for the solution of virtually every human resource problem. The authors describe several job analysis methods and then illustrate how to apply the results to problems arising in the management of people at work.

Thoroughly updated and revised, this Second Edition is the only book currently on the market to present the most important and commonly used methods in human resource management in such detail. The authors clearly outline how organizations can create programs to improve hiring and training, make jobs safer, provide a satisfying work environment, and help employees to work smarter. Throughout, they provide practical tips on how to conduct a job analysis, often offering anecdotes from their own experiences.

After serving nearly 20 years in prison on a murder conviction, Jesse Damon has been released, a home detention monitor strapped to his ankle. Determined to make it and mindful of his parole restrictions, he struggles with life outside prison. He finds a basement apartment, a job on the overnight shift at a steel fabrication plant and a few people who treat him like anybody else. Especially Kelly, a woman who works in the shipping department. He seems to be making it. Until Mitch, forklift driver on the shift, is found murdered in the warehouse. Investigating detective doesn't want to look any further than Jesse to close the case He's not fussy about the methods he uses to gather evidence. If Jesse isn't going down for this, he will have to be the one to figure out who killed Mitch—and why.

Track main safety checkpoints every day on each truck before employees operate fork lifts. This book prompts employees to check safety features such as fluid levels, gauges, tires, battery, lift system, plates, stickers, exhaust, belts, and hydraulic controls, and prompts employees to include their initials. There is also a signature log to record employees' printed names and examples of their initials for tracking purposes. Further, several pages at the back of the book prompt mechanics to record the dates, billing numbers, parts numbers, and a narrative of services performed for preventative maintenance on each truck. This book is meant to stay with a single truck, and there is room at the front of the book to record identification information about each individual truck.

It is a requirement of The Occupational Safety and Health Administration (OSHA) that any person who operates a forklift should receive proper training and be evaluated under a minimum set of safety standards. Carolina Trucking Academy is pleased to offer a program designed to comply with these standards to those who wish to pursue work as a forklift operator.

Many businesses fail today, but not because of poor financing, outdated technology, or lack of qualified employees. They fail because they lack the very basic elements that are characteristic of all successful businesses. They have become reliant on high priced consultants, to advise them on a course of action, to make their companies profitable, without looking internally for the answers that are already there. Businesses look to technology as the answer for many of all of their financial shortcomings. Rather than increasing revenues through aggressive and creative sales programs, they opt for the short-sighted approach of cutting expenses and dispensing with valuable experienced employees. But, there is another option. As a struggling golfer must step back and reexamine his setup, approach, and follow through, so too, must company owners step back and reexamine the mechanics of their business. They do not need to reinvent the wheel, they need to use the wheel. It is time for businesses to concentrate on The Bottom Line and get Back to Basics.
