This well-presented collection with contributions from academics and administrators reflects the growing concern towards the present-day practice of governance. It focuses on the need for Governance for Sustainable Human Development to manage the country's social as well as economic resources leading to better development-founded on four pillars of Accountability, Transparency, Predictability, and Participation. It thus calls for unfolding various issues and devising suitable strategies towards humane governance through appropriate political, bureaucratic, economic, and legal reforms. Highlighting its theme in the initial chapters in the New Public Management perspective, the book goes on to unravel the major administrative loopholes in Indian administration, such as lack of transparency and accountability, and the stranglehold of corruption, all of which lead to human deprivation. Later chapters give a synoptic overview of administrative reforms so far undertaken in India, and emphasize the effectiveness of governance in establishing appropriate balance in relative roles of public, private and civil society organizations, rights and responsibilities of politicians, bureaucrats and community, and economic and social justice. The book closes on a positive note strongly reiterating administrative re-engineering to meet the challenges of the twenty-first century for ensuring a holistic development of the country. Recent and real life happenings infused in the text to substantiate arguments, make it an interesting reading. The book will be of immense use to the students and teachers of public administration, social science, political science, and those who practise public administration. It will also be useful to a large number of government departments-both at the union and the state levels.

The twenty stimulating and original essays in this volume provide a comprehensive analysis of the main strands of modern Indian political thought. The thinkers discussed are Rammohun Roy, Dayananda Saraswati, Bankimchandra Chattopadhyay, Ranade, Phule, Tilak, B R Ambedkar, Tagore, Sri Aurobindo, M N Roy, Jawaharlal Nehru and Gandhi. Separate essays are devoted to the Hindu and Muslim traditions in Indian political thought, Hindu nationalism, and the ideologies of the Communist and Sarvodaya movements. A significant feature of these essays is that they study each thinker or movement in the relevant socio-historical context as also examine the consequences and impact of modern Indian political theories. These are analysed from a world-historical and, to some extent, a political economy perspective. The essays in this collection highlight two major streams in modern Indian political thought--one which favoured the adoption or adaptation of western political traditions and the other which sought to evolve indigenous or alternative formulations. The overall conclusion that emerges from this volume is that in order to formulate an adequate political philosophy for the modern age, both the western and Indian traditions have to be taken into account. In this context, some of the essays highlight the contemporary global relevance of Gandhi's socio-political ideas. This book is a major contribution to modern political philosophy. It will be of great value to students and teacher of political science.

A pioneering venture, this book is the first major effort toward a valid comparison of the political systems of Asia, Africa, the Near East, and Latin America. After establishing a theoretical framework based on a functional approach to comparative politics, the authors apply their scheme to Southeast Asia (Lucian W. Pye), South Asia (Myron Weiner), SubSaharan Africa (James S. Coleman), the Near East (Dankwart Rustow), and Latin America (George I. Blanksten). In each area they survey the political background, the nature and function of political, governmental, and authoritative structures, the processes of change and means of political integration. The contributors have performed an extraordinarily difficult feat of classification, description, synthesis, and analysis in what promises to be a book of seminal importance in comparative politics. The essays in this book compare and analyze political processes in eight states within the Indian Union. A long introductory chapter by Myron Weiner sets the stage for individual studies of each state by separate scholars, namely: Myron Weiner (MIT) on Political Development in the Indian States; Paul H. Brass (University of Washington) on Uttar Pradesh; Wayne Wilcox (Columbia University) on Madhya Pradesh; Ram Joshi (S.I.E.S. College, Bombay) on Maharashtra; Balraj Puri (Editor, Kashmir Affairs) on Jammu and Kashmir; Marcus F. Franda (Colgate University) on West Bengal; Lawrence L. Shrader (Mills College) on Rajasthan; Hugh Gray (University of London) on Andhra Pradesh; and Baldev Raj Nayar (McGill University) on Punjab. Originally published in 1968. Human vulnerability to natural disasters is an age-old phenomenon. Besides nature's wrath, human interventions, too, have led to many calamities in the recent past. The heedless pace of development has left us ecologically barren. Most of the world's people live in ~developing~ economies, as do most of the world's poor. They also face the most debilitating consequences in the form of economic and social disruption caused by disasters. The long history of disasters and their intensity has brought the question of disaster management to the forefront. Disaster mitigation is a major component of a disaster management plan. Mitigation entails measures to reduce the physical, economic and social vulnerability of a community to disasters. Disaster management is still an untouched domain, suffering for want of systematic and committed research and development inputs. It is essential not only to consolidate its academic stature but also to infuse the requisite knowledge, skills and attitudes in the personnel connected with this field. This collection of articles from several contributors is an excellent analysis of different mitigation strategies. It offers insight into the different dimensions of disaster preparedness and mitigation. The underlying attempt in each chapter is to illuminate the pertinence of those mitigation efforts that would prepare everyone related with disaster management to comprehend and approach the problem more holistically. Besides government agencies, NGOs, and community-based bodies, the book is suitable for students pursuing the certificate programme in Disaster Management developed by the Indira Gandhi National Open University, New Delhi.

This book develops a critical understanding of Mahatma Gandhi's philosophy and practice in the context of contemporary challenges and engages with some of his key work and ideas. It highlights the relevance of Gandhi's legacy in the quest towards peace-building, equity and global justice. The volume examines diverse facets of Gandhi's holistic view of human life – social, economic and political – for the creation of a just society. Bringing together expert analyses and reflections, the chapters here emphasise the philosophical and practical urgency of Gandhi's thought and action. They explore the significance of his concepts of truth and nonviolence to address moral, spiritual and ethical issues, growing intolerance, conflict and violence, poverty and hunger, and environmental crisis for the present world. The volume serves as a platform for constructive dialogue for academics, researchers, policymakers and students to re-imagine Gandhi and his moral and political principles. It will be of great interest to those in philosophy, political studies, Gandhi studies, history, cultural studies, peace studies and sociology.

What Is Political Theory? provides students with a comprehensive overview of the current state of the discipline. Eleven substantive chapters address the most pressing topics in political theory today, including: - what resources do the classic texts still provide for political theorists? - what areas will political theorists focus on in the future? - can western political theory alone continue to provide a framework for responding to the challenges of modern political life? The authors assess the intellectual challenges to conventional political theory, such as post-structuralism and the scientific study of politics, that have revitalized the field in the last 30 years. They also broaden the perspective to take in non-western ideas and to reconceptualize political theory in the light of specifically global challenges. Students and teachers of political theory and political philosophy will find this book invaluable in understanding the factors that have shaped current political theory and which will guide its future development.

Focuses on the two central conflicts of capitalism, bourgeois versus proletarian and core versus periphery.

The evolution of political parties and party systems in the world's largest, most complex and volatile democracy reached a crucial stage at the turn of the century. The three general elections held in quick succession at the end of the nineties threw up three major trends; the apparent demise of the Congress Party as the dominant pan-national party; the emergence of a 'federalised' party structure and coalition politics; and the decline of the Third Front as a force in national politics. This topical collection of original essays by eminent scholars drawn from diverse disciplines examines these wide-ranging changes in political parties - their leadership, ideological profile, support base and programmatic content - as well as in the texture of the party system in the country. In understanding these complex processes this volume provides a comparative framework by bringing in the experiences of Germany and the European Union which are undergoing similar political transformation. The 'federalisation' of national politics and the significant transformation in India's political sociology are examined at four levels. 1. the structures and strategies, interaction patterns and processes of India's innumerable political parties as well as key questions governing the party system in the country; 2. the texture and pattern of political alliances from the national perspective - particularly, how alliances with regional parties are viewed and made by national parties; 3. conversely, the perspective of the regional parties in making these alliances; and 4. the impact of the 73rd Constitutional amendment on parties and politics at the local level and in small states. Overall, this volume provides an incisive and comprehensive analysis of the far-reaching changes in both party systems and electoral behaviour that have occurred since the end of the twentieth century. Constituting an important contribution to the on-going debate on these issues, this volume will attract the attention of students of Indian politics, political science, democracy, party systems and comparative politics.

Extensively revised and updated, this classic text revisits the central problem of searching for mainstream and alternative paradigms to guide us in comparative political inquiry. Building upon the first edition's comprehensive and systematic overview of frameworks, ideologies, and theories, the second edition highlights new directions and developments over the past decade, including the continuation of an ideological political science methodological innovations such as rational-choice, historical, and postbehavioural approaches new emphases on and links between political culture and participation the recasting of modernization theory and the revitalization of class analysis and a thoroughgoing post-Keynesian political economy point of view. The second edition continues the tradition of the first in updating what one reviewer commended as outstanding, excellent annotated bibliographies at the end of each chapter and the thorough survey of the general literature of comparative politics at the end of the book." In addition, the new edition includes an appendix of definitions that facilitate clarity and understanding of political science terminology, important for students at every level from the introductory on up. In a post-Cold War world in which challenges to comparative inquiry abound, ethnic conflict, authoritarian repression, state building and disintegration, new industrialization and postindustrialization, security systems redefined, the search for new paradigms that Theories of Comparative Politics represents gains in importance daily.

Voices of Emancipation seeks to recover the lives and words of former slaves in vivid detail, mining the case files of the U.S. Pension Bureau, which administered a huge pension system for Union veterans and their survivors in the decades following the Civil War. The files contain an invaluable, first-hand perspective of slavery, emancipation, black military service, and freedom. Moreover, as Pension Bureau examiners began interviewing black Union veterans and their families shortly after the Civil War, the files are arguably among the earliest sources of ex-slaves reflecting on their lives, occurring decades before better-known WPA Slave Narratives of the 1930s took place. Voices of Emancipation explores the words of former slaves topically, beginning with recollections of slavery, moving on to experiences of military service in the Civil War, the transition to freedom, and finally to reflections on marriage and family before and after emancipation. With an introduction that places the pension files in context and

presents the themes of the book, and historical commentary interwoven throughout the excerpts of the interviews themselves, Elizabeth A. Regosin and Donald R. Shaffer effectively introduce the files and the treasures they contain to students and general readers, but also provide specialists with an indispensable research tool.
