Lecture Notes on Cardiology, fourth edition, is a comprehensive introduction to one of the most rapidly changing specialties in clinical medicine. The completely new author team has produced an informative and highly accessible book, presenting clinical cardiology in a way that relates disease to underlying pathophysiological mechanisms, and linking this directly to the patient, their disease and its management. This new edition has been produced in response to the exciting new developments in all areas of

cardiology. It has been completely revised and rewritten, with an emphasis on recent major clinical trials relating to cardiology and the huge advances made in cardiac imaging techniques. These concepts are fully illustrated and a colour plate section has been added to show emergent techniques, including Doppler imaging and MRI. The succinct and topical content of this book means that it will not only appeal to the undergraduate medical student, but also to the junior doctor studying for higher examinations.

This volume presents the proceedings of the CLAIB 2014, held in Paraná, Entre Ríos, Argentina 29, 30 & 31 October 2014. The proceedings, presented by the Regional Council of Biomedical Engineering for Latin America (CORAL) offer research findings, experiences and activities between institutions and universities to develop Bioengineering, Biomedical Engineering and related sciences. The conferences of the American Congress of Biomedical Engineering are sponsored by the International Federation for Medical and Biological Engineering (IFMBE), Society for Engineering in Biology and Medicine (EMBS) and the Pan American Health Organization (PAHO), among other organizations and international agencies and bringing together scientists, academics and biomedical engineers in Latin America and other continents in an environment conducive to exchange and professional growth. The Topics include: - Bioinformatics and Computational Biology - Bioinstrumentation; Sensors, Micro and Nano Technologies - Biomaterials, Tissue Engineering and Artificial Organs - Biomechanics, Robotics and Motion Analysis - Biomedical Images and Image Processing - Biomedical Signal Processing - Clinical Engineering and Electromedicine - Computer and Medical Informatics - Health and home care, telemedicine - Modeling and Simulation - Radiobiology, Radiation and Medical Physics - Rehabilitation Engineering and Prosthetics - Technology, Education and Innovation

Chest Pain: Advanced Assessment and Management promotes a systematic approach to the assessment and management of patients presenting with chest pain and related undifferentiated symptoms. Specifically, it equips practitioners with the knowledge and clinical skills needed to effectively differentiate and respond to clinical presentations where the primary symptom for seeking healthcare advice involves chest pain. Introductory chapters in section one explore the principles of physical assessment, history taking and differential diagnosis to provide the framework for subsequent chapters, which explore cardiac and non-cardiac causes of chest pain. Section two examines the advanced assessment and overall management of patients with pain in the chest. A range of clinical conditions that trigger chest pain and other related symptoms are covered, including: angina, acute coronary syndromes, pericarditis and myocarditis, aortic dissection, pulmonary

embolism, oesophago-gastric disorders, musculoskeletal causes, pulmonary and respiratory causes, coronary heart disease, myocardial infarction, chest pain caused by trauma or cardiac syndrome X, cocaine misuse and Herpes zoster.

Lecture Notes: Human Physiology provides concise coverage of general physiology for medical students as well as students of biological sciences, sport science, pharmacology and nursing. One of the brothers—Robert I. Habetrwongo, MD—is a cardiologist. This is the story of his exploits as a physician and research scientist. During his internship he was put into the limelight in England by transplanting a baby's heart without any prior experience, and the queen of England had crowned him Sir Roberts for his deed. Sir Robert had become a hero to the queen because of his untiring efforts in heart surgery. Because of this, he, the hero, had become well-known and had become a target by well-known activists and terrorists. His sister

Grace Habetrawongo, a journalist, had aided her brother Sir Robert by recording everything that he did and accomplished. The publication of her monthly journals had created a firestorm worldwide.
