SAP ERP modules are notoriously hard to configure and use effectively without a
lot of practice and experience. But as SAP ERP Financial Accounting and
Controlling: Configuration and Use Management shows, it doesn't have to be so
difficult. The book takes a systematic approach that leads SAP Financial
Accounting and Controlling (FICO) users step by step through configuring and
using all the program's facets. This approach makes configuration complexities
manageable. The book's author—SAP expert, trainer, and accountant Andrew
Okungbowa—ensures that both you and your end users are up and running
quickly and confidently with FICO. He also provides sound and tested procedures
that ensure your implementation works without error. SAP ERP Financial
Accounting and Controlling: Configuration and Use Management is in fact the
most comprehensive and easy-to-follow SAP FICO configuration book in the
market. It incorporates a hands-on approach, with hundreds of screen shots and
practical examples, that allows a person without prior configuration training to
make SAP FICO ready for use in the enterprise. You'll find that you don't need
to be a rocket scientist to grasp the concepts explained and apply them to your
work—even when the finances are complicated, such as with the ins and outs of
taxes, currency conversions, or special general ledger entries such as down
payments or bills of exchange. Providing an in-depth coverage of both
configuration and end user procedures, the book covers most aspects of the SAP
FICO certification syllabus—SAP's view of the module's key tasks and
procedures—including: Configuring and using the general ledger and accounts
payable and receivable screens Configuring and completing closing procedures,
asset accounting, and financial reporting Configuring global settings and
enterprise variables Accounting for both profit and cost centers Creating a house
bank Integrating FICO with other SAP modules Taking a jargon-free tone and
providing an abundance of examples, Andrew Okungbowa provides a clear
understanding of configuration techniques and the breadth of functionalities
encompassed by SAP FICO. And as an accountant, Okungbowa understands
the needs of end users as well as of those answering to the CIO.
