Traces the dynamic expression of the American experience and how the nation's sense of identity offers alternate perspectives into history, in an anthology that also explores modern cultural creations in a range of disciplines.

The Vikings called North America "Vinland," the land of wine. Giovanni de Verrazzano, the Italian explorer who first described the grapes of the New World, was sure that "they would yield excellent wines." And when the English settlers found grapes growing so thickly that they covered the ground down to the very seashore, they concluded that "in all the world the like abundance is not to be found." Thus, from the very beginning the promise of America was, in part, the alluring promise of wine. How that promise was repeatedly baffled, how its realization was gradually begun, and how at last it has been triumphantly fulfilled is the story told in this book. It is a story that touches on nearly every section of the United States and includes the whole range of American society from the founders to the latest immigrants. Germans in Pennsylvania, Swiss in Georgia, Minorcans in Florida, Italians in Arkansas, French in Kansas, Chinese in California—all contributed to the domestication of Bacchus in the New World. So too did innumerable individuals, institutions, and organizations. Prominent politicians, obscure farmers, eager amateurs, sober scientists: these and all the other kinds and conditions of American men and women figure in the story. The history of wine in America is, in many ways, the history of American origins and of American enterprise in microcosm. While much of that history has been lost to sight, especially after Prohibition, the recovery of the record has been the goal of many investigators over the years, and the results are here brought together for the first time. In print in its entirety for the first time, *A History of Wine in America* is the most comprehensive account of winemaking in the United States, from the Norse discovery of native grapes in 1001 A.D., through Prohibition, and up to the present expansion of winemaking in every state.

While mainstream financial theories and applications assume that asset returns are normally distributed and individual preferences are quadratic, the overwhelming empirical evidence shows otherwise. Indeed, most of the asset returns exhibit "fat-tails" distributions and investors exhibit asymmetric preferences. These empirical findings lead to the development of a new area of research dedicated to the introduction of higher order moments in portfolio theory and asset pricing models. Multi-moment asset pricing is a revolutionary new way of modeling time series in finance which allows various degrees of long-term memory to be generated. It allows risk and prices of risk to vary through time enabling the accurate valuation of long-lived assets. This book presents the state-of-the art in multi-moment asset allocation and pricing models and provides many new developments in a single volume, collecting in a unified framework theoretical results and applications previously scattered throughout the financial literature. The topics covered in this comprehensive volume include: four-moment individual risk preferences, mathematics of the multi-moment efficient frontier, coherent asymmetric risks measures, hedge funds asset allocation under higher moments, time-varying specifications of (co)moments and multi-moment asset pricing models with homogeneous and heterogeneous agents.

Written by leading academics, *Multi-moment Asset Allocation and Pricing Models* offers a unique opportunity to explore the latest findings in this new field of research.

Many recognize Giant City State Park as one of the premier recreation spots in southern Illinois, with its unspoiled forests, glorious rock formations, and famous sandstone lodge. But few know the park's history or are aware of the remarkable men who struggled to build it. *Giant City State Park and the Civilian Conservation Corps: A History in Words and Pictures* provides the first in-depth portrait of the park's creation, drawing on rarely seen photos, local and national archival research, and interviews to present an intriguing chapter in Illinois history. Kay Rippelmeyer traces the geological history of the park, exploring the circumstances that led to the breathtaking scenery for which Giant City is so well known, and providing insightful background on and cultural history of the area surrounding the park. Rippelmeyer then outlines the effects of the Great Depression and the New Deal on southern Illinois, including relief efforts by the Civilian Conservation Corps, which began setting up camps at Giant City in 1933. The men of the CCC, most of them natives of southern and central Illinois, are brought to life through vividly detailed, descriptive prose and hundreds of black-and-white photographs that lavishly illustrate life in the two camps at the park. This fascinating book not only documents the men's hard work—from the clearing of the first roads and building of stone bridges, park shelters, cabins, and hiking and bridle trails, to quarry work and the raising of the lodge's famous columns—it also reveals the more personal side of life in the two camps at the park, covering topics ranging from education, sports, and recreation, to camp newspapers, and even misbehavior and discipline. Supplementing the photographs and narrative are engaging conversations with alumni and family members of the CCC, which give readers a rich oral history of life at Giant City in the 1930s. The book is further enhanced by maps, rosters of enrollees and officers, and a list of CCC camps in southern Illinois. The culmination of three decades of research, *Giant City State Park and the Civilian Conservation Corps* provides the most intimate history ever of the park and its people, honoring one of Illinois's most unforgettable places and the men who built it.
