The late Dwight Conquergood's research has inspired an entire generation of scholars invested in performance as a meaningful paradigm to understand human interaction, especially between structures of power and the disenfranchised. Conquergood's research laid the groundwork for others to engage issues of ethics in ethnographic research, performance as a meaningful paradigm for ethnography, and case studies that demonstrated the dissolution of theory/practice binaries. *Cultural Struggles* is the first gathering of Conquergood's work in a single volume, tracing the evolution of one scholar's thinking across a career of scholarship, teaching, and activism, and also the first collection of its kind to bring together theory, method, and complete case studies. The collection begins with an illuminating introduction by E. Patrick Johnson and ends with commentary by other scholars (Micaela di Leonardo, Judith Hamera, Shannon Jackson, D. Soyini Madison, Lisa Merrill, Della Pollock, and Joseph Roach), engaging aspects of Conquergood's work and providing insight into how that work has withstood the test of time, as scholars still draw on his research to inform their current interests and methods.

Today's research landscape requires an updated set of analytical skills to tell the story of how people interact with and make meaning from contemporary culture. *Hybrid Ethnography: Online, Offline, and In Between* provides researchers with concrete and theory-based processes to combine online and offline research methods to tell the story of how and why people are interacting with expressive culture. This book provides a roadmap for combining online and in-person ethnographic research in an explicit manner to support the reality of much contemporary fieldwork. In the tradition of the *Qualitative Research Methods* series, this concise book serves graduate students and faculty learning ethnography and field methods, as well as those designing, conducting, and writing up their own dissertations and research studies. From choosing the pursue a hybrid ethnographic strategy to collecting data to analyzing and sharing results, author Liz Przybylski covers all aspects of conducting a hybrid ethnography study.

This book is a powerful portrayal of class inequalities in the United States. It contains insightful analysis of the processes through which inequality is reproduced, and it frankly engages with methodological and analytic dilemmas usually glossed over in academic texts.

Explores participant observation in this guide to the systematic collection of data in naturalistic settings - communities in

many different cultures - to achieve an understanding of the most fundamental processes and patterns of social life. A comprehensive and practical guide to ethnographic research, this book guides you through the process, starting with the fundamentals of choosing and proposing a topic and selecting a research design. It describes methods of data collection (taking notes, participant observation, interviewing, identifying themes and issues, creating ethnographic maps and tables and charts, and referring to secondary sources) and analyzing and writing ethnography (sorting and coding data, answering questions, choosing a presentation style, and assembling the ethnography). Although content is focused on producing written ethnography, many of the principles and methods discussed here also apply to other forms of ethnographic presentation, including ethnographic film. Designed to give basic hands-on experience in the overall ethnography research process, *Ethnography Essentials* covers a wealth of topics, enabling anyone new to ethnography research to successfully explore the excitement and challenges of field research.

Interviews were once regarded as the pipeline through which information was transmitted from a passive subject to an omniscient researcher. However the new "active interview" considers interviewers and interviewees as equal partners in constructing meaning around an interview. This interpretation changes a range of elements in the interview process - from the way of conceiving a sample to the ways in which the interview may be conducted and the results analyzed. In this guide, the authors outline the differences between active and traditional interviews and give novice researchers clear guidelines on conducting a successful interview.

A must-read classic for anyone—academic ethnographers to market researchers—involved with data collection from individual human beings. *The Ethnographic Interview* is a practical, self-teaching handbook that guides readers step-by-step through interview techniques commonly used to research ethnography and culture. The text also shows how to analyze collected data and how to write an ethnography. Appendices include research questions and writing tasks. "This book exists, is here for you as a resource because we, the authors/editors of this text (Suzanne Blum Malley and Ames Hawkins), saw very similar, very exciting things happening in our classrooms using ethnographic research methods in our inquiry-based first-year writing classrooms. We have watched our students develop strong voices as writers, while also using critical analytical skills and addressing important ideas of ethics, identity, and representation. In our classrooms, we have seen a greater level of investment in ethnographic projects than we have seen in more traditional rhetorically based assignments. Ethnographic writing, by creating a very authentic role for the researcher and a connection to community, offers a means to address the alienation and/or boredom that many non-traditional writers and first-year college students feel when confronted with the traditional composition curriculum—any curriculum, actually. More importantly, ethnographic research allows students to access what can seem so terribly difficult when framed in other

assignments: to pursue a line of inquiry rather than a topic, to research ethically, and to write with authority. Though we initially wrote this text with the first-year writing classroom in mind, we have come to understand that there are many courses that also present students with ethnographic writing assignments. These courses may or may not be designed to spend much time on the question of how to get started with these projects. In addition, instructors might want to supplement the basic methodological approach with their own course content. We are also aware that textbook size and cost has exploded in recent years. We believe in preserving the internet as an open-source space and wish to reinforce our belief with practice. As a result of these realizations, we have reorganized the project in order to 1) Make it relevant and accessible to students in nearly any college classroom who might be assigned an ethnographic writing project; 2) Allow instructors to supplement the core methodology (presented here in Chapters 1–6), as they see fit, using any number of Supplemental Modules that offer additional materials, lenses, and multi-modal examples of and for issues and ideas discussed in the core text. 3) Make it accessible and available, via the internet and other technological platforms, to students and instructors everywhere. A disclaimer: we want to make clear that while we use and invoke methodological principles and practices associated with ethnography, we are not claiming *Engaging Communities* as a text that teaches ethnography as a research methodology. This book has been designed to help students (most likely undergraduates, perhaps high school, possibly graduates) envision interesting, hands-on research projects that are eventually converted—translated—into written text. Throughout the text, we often use the word ethnographic in order to describe our methodological presentation and theoretical concerns as this term reflects the pedagogical (teaching) and rhetorical (arguing) concerns of ethnography, rather than the actual disciplinary understanding of the methodology. We choose to use to teach this way because ethnographic writing allows for specific discussion regarding how to involve and interest a reader, in evoking physical and emotional connection with writing, rather than simply becoming informed or persuaded by any specific piece of writing"--Back cover.

Writing the New Ethnography provides a foundational understanding of the writing processes associated with composing new forms of qualitative writing in the social sciences. Goodall's distinctive style will engage and energize students, offering them provocative advice and exercises for turning qualitative data and field notes into compelling representations of social life.

Anton Chekhov is revered as a boldly innovative playwright and short story writer—but he wrote more than just plays and stories. In *Alive in the Writing*—an intriguing hybrid of writing guide, biography, and literary analysis—anthropologist and novelist Kirin Narayan introduces readers to some other sides of Chekhov: his pithy, witty observations on the writing process, his life as a writer through accounts by his friends, family, and lovers, and his venture into nonfiction through his book *Sakhalin Island*. By closely attending to the people who lived under the appalling conditions of the Russian penal colony on Sakhalin, Chekhov showed how empirical details combined with a literary flair can bring readers face to face with distant, different lives, enlarging a sense of human responsibility. Highlighting this balance of the empirical and the

literary, Narayan calls on Chekhov to bring new energy to the writing of ethnography and creative nonfiction alike. Weaving together selections from writing by and about him with examples from other talented ethnographers and memoirists, she offers practical exercises and advice on topics such as story, theory, place, person, voice, and self. A new and lively exploration of ethnography, *Alive in the Writing* shows how the genre's attentive, sustained connection with the lives of others can become a powerful tool for any writer.

Full of practical 'how to' tips for applying theoretical methods - 'doing ethnography' - this book also provides anecdotal evidence and advice for new and experienced researchers on how to engage with their own participation in the field - 'being ethnographic'. The book clearly sets out the important definitions, methods and applications of field research whilst reinforcing the infinite variability of the human subject and addressing the challenges presented by ethnographers' own passions, intellectual interests, biases and ideologies. Classic and personal real-world case studies are used by the author to introduce new researchers to the reality of applying ethnographic theory and practice in the field. Topics include: - Talking to People: negotiations, conversations & interviews - Being with People: participation - Looking at People: observations & images - Description: writing 'down' field notes - Analysis to Interpretation: writing 'out' data - Interpretation to Story: writing 'up' ethnography Clear, engaging and original this book provides invaluable advice as well as practical tools and study aids for those engaged in ethnographic research.

Ethnography centers on the culture of everyday life. So it is ironic that most scholars who do research on the intimate experiences of ordinary people write their books in a style that those people cannot understand. In recent years, the ethnographic method has spread from its original home in cultural anthropology to fields such as sociology, marketing, media studies, law, criminology, education, cultural studies, history, geography, and political science. Yet, while more and more students and practitioners are learning how to write ethnographies, there is little or no training on how to write ethnographies well. *From Notes to Narrative* picks up where methodological training leaves off. Kristen Ghodsee, an award-winning ethnographer, addresses common issues that arise in ethnographic writing. Ghodsee works through sentence-level details, such as word choice and structure. She also tackles bigger-picture elements, such as how to incorporate theory and ethnographic details, how to effectively deploy dialogue, and how to avoid distracting elements such as long block quotations and in-text citations. She includes excerpts and examples from model ethnographies. The book concludes with a bibliography of other useful writing guides and nearly one hundred examples of eminently readable ethnographic books.

Editing is a tricky business. It requires analytical flair and creative panache, the patience of a saint and the vision of a writer. Transforming a manuscript into a book that edifies, inspires, and sells? That's the job of the developmental editor, whose desk is the first stop for many manuscripts on the road to bookdom—a route ably mapped out in the pages of *Developmental Editing*. Author Scott Norton has worked with a diverse range of authors, editors, and publishers, and his handbook provides an approach to developmental editing that is logical, collaborative, humorous, and realistic. He starts with the core tasks of shaping the proposal, finding the hook, and building the narrative or argument, and then turns to the hard work of executing the plan and establishing a style. *Developmental Editing* includes detailed case studies featuring a variety of nonfiction books—election-year polemic, popular science, memoir, travel guide—and authors ranging from first-timer to veteran, journalist to scholar. Handy sidebars offer advice on how to become a developmental editor, create effective illustration programs, and adapt sophisticated fiction techniques (such as point of view, suspense, plotting, character, and setting) to nonfiction writing. Norton's book also provides freelance copyeditors with a way to earn higher fees while introducing more creativity into their work lives. It gives acquisitions, marketing, and production staff a vocabulary for diagnosing a manuscript's flaws and techniques for transforming it into a

bestseller. And perhaps most importantly, *Developmental Editing* equips authors with the concrete tools they need to reach their audiences. 'Written in a clear, accessible style, this inspirational book is both a practical guide and a survey of the different ways of doing ethnography. Drawing on wide-ranging examples and using classic and contemporary ethnographies, the authors demonstrate the importance of developing an ethnographic sensibility. A most valuable resource' - Cris Shore, University of Auckland *Ethnography in Education* is an accessible guidebook to the different approaches taken by ethnographers studying education. Drawing on their own experience of teaching and using these methods, the authors help you cultivate an 'ethnographic imagination' in your own research and writing. With extended examples of ethnographic analysis, the book will introduce you to: - ethnographic 'classics' - the best existing textbooks - debates about new approaches and innovations. This book is ideal for postgraduate students in Education and related disciplines seeking to use an ethnographic approach in their Masters and Doctoral theses. David Mills is a University Lecturer in Education, University of Oxford. Missy Morton is Associate Professor and Head of School of Educational Studies and Leadership, College of Education, University of Canterbury

Research Methods in Education series: Each book in this series maps the territory of a key research approach or topic in order to help readers progress from beginner to advanced researcher. Each book aims to provide a definitive, market-leading overview and to present a blend of theory and practice with a critical edge. All titles in the series are written for Master's-level students anywhere and are intended to be useful to the many diverse constituencies interested in research on education and related areas. Other books in the series: - *Using Case Study in Education Research*, Hamilton and Corbett-Whittier - *Qualitative Research in Education*, Atkins and Wallace - *Action Research in Education*, McAteer

Students and researchers all write under pressure, and those pressures—most lamentably, the desire to impress your audience rather than to communicate with them—often lead to pretentious prose, academic posturing, and, not infrequently, writer's block. Sociologist Howard S. Becker has written the classic book on how to conquer these pressures and simply write. First published nearly twenty years ago, *Writing for Social Scientists* has become a lifesaver for writers in all fields, from beginning students to published authors. Becker's message is clear: in order to learn how to write, take a deep breath and then begin writing. Revise. Repeat. It is not always an easy process, as Becker wryly relates. Decades of teaching, researching, and writing have given him plenty of material, and Becker neatly exposes the foibles of academia and its "publish or perish" atmosphere. Wordiness, the passive voice, inserting a "the way in which" when a simple "how" will do—all these mechanisms are a part of the social structure of academic writing. By shrugging off such impediments—or at the very least, putting them aside for a few hours—we can reform our work habits and start writing lucidly without worrying about grades, peer approval, or the "literature." In this new edition, Becker takes account of major changes in the computer tools available to writers today, and also substantially expands his analysis of how academic institutions create problems for them. As competition in academia grows increasingly heated, *Writing for Social Scientists* will provide solace to a new generation of frazzled, would-be writers.

This best-selling book, designed for researchers embarking on their first ethnographic project, has been substantially revised and updated, with lots of exercises and advice to guide the embodied and creative 'practice' of ethnography. New additions include cyber-ethnography, sensual, visual and mobile ethnographies, and 'field walking'.

In this book, three leading scholars develop a series of guidelines, suggestions, and practical advice about how to write useful fieldnotes in a variety of settings, both cultural and institutional. Using actual unfinished, "working" notes as examples, they illustrate options for composing, reviewing, and working fieldnotes into finished texts. They discuss different organizational and descriptive strategies, and show how

transforming direct observations into vivid descriptions results not simply from good memory but more crucially from learning to remember dialogue and movement like an actor, to see colors and shapes like a painter, and to sense moods and rhythms like a poet. A vigorous and persuasive response to those who say that fieldnotes are too idiosyncratic, personal, and dependent on natural talent to allow formal instruction, this book shows that note-taking is a craft that can be taught. It is an essential tool for students and social scientists alike.

"An accessible and entertaining read, useful to anybody interested in the ethnographic method." - Paul Miller, University of Cumbria "A very good introduction to ethnographic research, particularly useful for first time researchers." - Heather Macdonald, Chester University "The perfect introductory guide for students embarking on qualitative research for the first time... This should be of aid to the ethnographic novice in their navigating what is a theoretically complex and changing methodological field." - Patrick Turner, London Metropolitan University An accessible, authoritative, non-nonsense guide to the key concepts in one of the most widely used methodologies in social science:

Ethnography, this book: Explores and summarises the basic and related issues in ethnography that are covered nowhere else in a single text. Examines key topics like sampling, generalising, participant observation and rapport, as well as embracing new fields such as virtual, visual and multi-sighted ethnography and issues such as reflexivity, writing and ethics. Presents each concept comprehensively yet critically, alongside relevant examples. This is not quite an encyclopaedia but far more than a dictionary. It is comprehensive yet brief. It is small and neat, easy to hold and flick through. It is what students and researchers have been waiting for.

In some parts of South Africa, more than one in three people are HIV positive. *Love in the Time of AIDS* explores transformations in notions of gender and intimacy to try to understand the roots of this virulent epidemic. By living in an informal settlement and collecting love letters, cell phone text messages, oral histories, and archival materials, Mark Hunter details the everyday social inequalities that have resulted in untimely deaths. Hunter shows how first apartheid and then chronic unemployment have become entangled with ideas about femininity, masculinity, love, and sex and have created an economy of exchange that perpetuates the transmission of HIV/AIDS. This sobering ethnography challenges conventional understandings of HIV/AIDS in South Africa.

Ideal for instructors who want the flexibility to assign additional readings, *Race and Racisms: A Critical Approach, Brief Second Edition*, is a topical text that engages students in significant questions related to racial dynamics in the United States and around the world. Shorter than Golash-Boza's highly acclaimed comprehensive text, the Brief Second Edition features a streamlined narrative and is enhanced by its own unique features. Organized into topics and concepts rather than discrete racial groups, the text addresses: * How and when the idea of race was created and developed * How structural racism has worked historically to reproduce inequality * How we have a society rampant with racial inequality, even though most people do not consider themselves to be racist * How race, class, and gender work together to create inequality and identities * How immigration policy in the United States has been racialized * How racial justice could be imagined and realized Centrally focused on racial dynamics, *Race and Racisms, Brief Second Edition*, also incorporates an intersectional perspective, discussing the intersections of racism, patriarchy, and capitalism.

Rosaline Barbour draws on her extensive teaching experience to provide a clear, user-friendly introduction to the craft of doing qualitative research. Each chapter includes examples of real-life qualitative data and a range of exercises to help students get a feel for the process of generating and analysing qualitative data. The second edition includes: New examples from a range of social science disciplines, making this the perfect book no matter what course you're studying More on unobtrusive methods of data collection, such as documentary analysis More on internet research methods, mixed methods and visual methods A new section on using software in qualitative research A brand new

Once upon a time ethnographers returning from the field simply sat down, shuffled their note cards, and wrote up their descriptions of the exotic and quaint customs they had observed. Today scholars in all disciplines are realizing how their research is presented is at least as important as what is presented. Questions of voice, style, and audience--the classic issues of rhetoric--have come to the forefront in academic circles. John Van Maanen, an experienced ethnographer of modern organizational structures, is one who believes that the real work begins when he returns to his office with cartons of notes and tapes. In *Tales of the Field* he offers readers a survey of the narrative conventions associated with writing about culture and an analysis of the strengths and weaknesses of various styles. He introduces first the matter-of-fact, realistic report of classical ethnography, then the self-absorbed confessional tale of the participant-observer, and finally the dramatic vignette of the new impressionistic style. He also considers, more briefly, literary tales, jointly told tales, and the theoretically focused formal and critical tales. Van Maanen illustrates his discussion of each style with excerpts from his own work on the police. *Tales of the Field* offers an informal, readable, and lighthearted treatment of the rhetorical devices used to present the results of fieldwork. Though Van Maanen argues ultimately for the validity of revealing the self while representing a culture, he is sensitive to the differing methods and aims of sociology and anthropology. His goal is not to establish one true way to write ethnography, but rather to make ethnographers of all varieties examine their assumptions about what constitutes a truthful cultural portrait and select consciously and carefully the voice most appropriate for their tales. Written with grace and humor, *Tales of the Field* will be an invaluable introduction to novices just learning the fieldwork trade and provocative stimulant to veteran ethnographers. "Engaging and well written."--H. Ottenheimer, *Choice*

Field Stories presents and analyzes fieldwork stories shared in classrooms to demonstrate how ethnographic methods and analysis can be communicated more clearly to the next generation of students. The chapters are rich in detail, and written in clear narrative prose, highlighting the value of ethnographic data, and the enchantment of the field.

When conducting research in developing countries, an ability to negotiate a bewildering array of cultural and logistical obstacles is essential. *Overseas Research: A Practical Guide* distills essential lessons from scores of students and scholars who have collected data and done fieldwork abroad, including how to prepare for the field, how and where to find funding for one's fieldwork, issues of personal safety and security, and myriad logistical and relational issues. By encouraging researchers to think through the challenges of research before they begin it, *Overseas Research* will help prepare fieldworkers for the practical, logistical, and psychological considerations of very demanding work, help save valuable time, make the most of scarce financial resources, and enhance the quality of the field research. This third edition contains new material on social media, including representation of research subjects/collaborators, students' digital branding and image, and representing universities abroad when posting publicly. It also covers emerging technologies such as solar panels for power in remote locations, new ways of digitally sending and receiving money, and incorporates more perspectives of women, LGBTQ+ people, and people of color researching abroad. The book will be of interest to overseas fieldworkers, and also to undergraduates in subjects such as anthropology, economics, geography, history, international studies, politics, sociology, and development studies.

The Teaching Writing series publishes user-friendly writing guides penned by authors with publishing records in their subject matter. While ethnographers inevitably write up their findings from the field, many ethnography textbooks focus more on the 'ethno' portion of our craft, and less on developing our 'graph' skills. *Gullion* fills that gap, helping ethnographers write compelling, authentic stories about their fieldwork. From putting the first few words on the page, to developing a plot line, to publishing, *Writing Ethnography* offers guidance for all

stages of the writing process. Writing prompts throughout the book encourage the development of manuscripts from start to finish. Appropriate for both new and emerging scholars, Writing Ethnography is a useful text for qualitative methods, research methods courses across disciplines. “This is a must read for anyone who is learning about ethnography and is unsure about how to start writing.” – Kakali Bhattacharya, PhD, Associate Professor of Educational Leadership, Kansas State University “I love this writer because she does her homework, cares about her readers, and writes a damn good story. Buy this book immediately.” – Anne Harris, PhD, Senior Lecturer of Education, Monash University and author of Critical Plays: Embodied Research for Social Change and The Creative Turn: Toward a New Aesthetic Imaginary “In this foundational text, Gullion accomplishes the herculean task of talking about the overlooked process of ethnographic writing with an intimate tone. It is like we are seated at her desk writing along with her. This text will be required reading in my research methods courses and for my graduate students because of the meticulous breakdown of writing practice that creates a text that is both useful and engaging.” – Sandra Faulkner, PhD, Associate Professor of Communication, Bowling Green State University and author of Family Stories, Poetry, and Women’s Work and Poetry as Method: Reporting Research Through Verse Jessica Smartt Gullion, PhD, is Assistant Professor of Sociology and Affiliate Faculty of Women’s Studies at Texas Woman’s University. She has published more than thirty peer-reviewed journal articles and book chapters, in journals such as Qualitative Inquiry, the International Review of Qualitative Research, and the Journal of Applied Social Science. She has also written two additional books, Fracking the Neighborhood: Reluctant Activists and Natural Gas Drilling with the MIT Press and October Birds: A Novel about Pandemic Influenza, Infection Control, and First Responders, which is part of the award-winning Social Fictions Series with Sense Publishers.

With regular exercises, lists of key terms and points and self-evaluation checklists, Doing Ethnography systematically describes the various phases of an ethnographic inquiry and provides numerous examples, suggestions and advice for the novice ethnographer. Ethnography seeks to understand, describe and explain the symbolic world lying beneath the social action of groups, organizations and communities. This book clearly sets out the coordinates and foundations of this increasingly popular methodology. Giampietro Gobo discusses all the major issues, including the research design, access to the field, data collection, organisation and analysis, and communication of the results. Presents the lives of poor African-American men who make their subsistence wages by selling used goods on the streets of Greenwich Village in New York; and discusses how they interact with passing pedestrians, police officers, and each other.

Essays discuss collaboration, revision, the translation of Japanese, problems of translation, and medieval European poetry Learning From Strangers is the definitive work on qualitative research interviewing. It draws on Robert Weiss's thirty years of experience in interviewing and teaching others how to do it. The most effective interviews, says Weiss, rely on creating cooperation -- an open and trusting alliance between interviewer and respondent, dedicated to specific and honest accounts of both internal and external events. Against the eclectic background of his work in national sample surveys, studies based on semi-structured interviewing, and participant observation, Weiss walks the reader through the method of qualitative interview studies: sample selection, development of an interview guide, the conduct of the interview, analysis, and preparation of the data. Weiss gives examples of successful and less successful interviews and offers specific techniques and guidelines for the practitioner.

“You might think that dancing doesn’t have a lot to do with social research, and doing social research is probably why you picked this book up in the first place. But trust me. Salsa dancing is a practice as well as a metaphor for a kind of research that will make your life easier and better.” Savvy, witty, and sensible, this unique book is both a handbook for defining and completing a research project, and an astute

introduction to the neglected history and changeable philosophy of modern social science. In this volume, Kristin Luker guides novice researchers in: knowing the difference between an area of interest and a research topic; defining the relevant parts of a potentially infinite research literature; mastering sampling, operationalization, and generalization; understanding which research methods best answer your questions; beating writer's block. Most important, she shows how friendships, non-academic interests, and even salsa dancing can make for a better researcher. "You know about setting the kitchen timer and writing for only an hour, or only 15 minutes if you are feeling particularly anxious. I wrote a fairly large part of this book feeling exactly like that. If I can write an entire book 15 minutes at a time, so can you."

In *Writing Ethnographic Fieldnotes*, Robert M. Emerson, Rachel I. Fretz, and Linda L. Shaw present a series of guidelines, suggestions, and practical advice for creating useful fieldnotes in a variety of settings, demystifying a process that is often assumed to be intuitive and impossible to teach. Using actual unfinished notes as examples, the authors illustrate options for composing, reviewing, and working fieldnotes into finished texts. They discuss different organizational and descriptive strategies and show how transforming direct observations into vivid descriptions results not simply from good memory but from learning to envision scenes as written. A good ethnographer, they demonstrate, must learn to remember dialogue and movement like an actor, to see colors and shapes like a painter, and to sense moods and rhythms like a poet. This new edition reflects the extensive feedback the authors have received from students and instructors since the first edition was published in 1995. As a result, they have updated the race, class, and gender section, created new sections on coding programs and revising first drafts, and provided new examples of working notes. An essential tool for budding social scientists, the second edition of *Writing Ethnographic Fieldnotes* will be invaluable for a new generation of researchers entering the field.

Ethnography and Virtual Worlds is a guide for students, teachers, designers, and scholars interested in using ethnographic methods to study online virtual worlds, including both game and nongame environments. Focusing on the key method of participant observation, the book provides advice, tips, guidelines, and principles to aid researchers through every stage of a project, from choosing an online fieldsite to writing and publishing the results.

Now in its third edition, this leading introduction to ethnography has been thoroughly updated and substantially rewritten. It offers a systematic introduction to ethnographic principles and practice. New material covers the use of visual and virtual research methods, hypermedia software and the issue of ethical regulation. There is also a new prologue and epilogue. The authors argue that ethnography is best understood as a reflexive process. What this means is that we must recognize that social research is part of the world that it studies. From an outline of the principle of reflexivity the authors go on to discuss and exemplify main features of ethnographic work, including: the selection and sampling of cases the problems of access observation and interviewing recording and filing data the process of data analysis and writing research reports. Throughout, the discussion draws on a wide range of illustrative material from classic and more recent studies within a global context. The new edition of this popular textbook will be an indispensable resource for students and researchers utilizing social research methods in the social sciences and cultural studies.

In *Writing Anthropology*, fifty-two anthropologists reflect on scholarly writing as both craft and commitment. These short essays cover a wide range of territory, from ethnography, genre, and the politics of writing to affect, storytelling, authorship, and scholarly responsibility.

Anthropological writing is more than just communicating findings: anthropologists write to tell stories that matter, to be accountable to the communities in which they do their research, and to share new insights about the world in ways that might change it for the better. The contributors offer insights into the beauty and the function of language and the joys and pains of writing while giving encouragement to stay at

The definitive step-by step resource for qualitative and ethnographic research *Qualitative Research Methods: Collecting Evidence, Crafting Analysis, Communicating Impact* is a comprehensive guide on both the theoretical foundations and practical application of qualitative methodology. Adopting a phronetic-iterative approach, this foundational book leads readers through the chronological progression of a qualitative research project, from designing a study and collecting and analyzing data to developing theories and effectively communicating the results—allowing readers to employ qualitative methods in their projects as they follow each chapter. Coverage of topics such as qualitative theories, ethics, sampling, interview techniques, qualitative quality, and advice on practical fieldwork provides clear and concise guidance on how to design and conduct sound research projects. Easy-to-follow instructions on iterative qualitative data analysis explain how to organize, code, interpret, make claims, and build theory. Throughout, the author offers her own backstage stories about fieldwork, analysis, drafting, writing, and publishing, revealing the emotional and humorous aspects of practicing qualitative methods. Now in its second edition, this thorough and informative text includes new and expanded sections on topics including post-qualitative research, phenomenology, textual analysis and cultural studies, gaining access to elite and difficult to access populations, on persuasive writing, novel interviewing approaches, and more. Numerous examples, case studies, activities, and discussion questions have been updated to reflect current research and ensure contemporary relevance. Written in an engaging and accessible narrative style by an acclaimed scholar and researcher in the field Offers new and updated examples of coding and qualitative analysis, full-color photos and illustrations, and a companion instructor website Synthesizes the most up-to-date multidisciplinary literature on qualitative research methods including seven main approaches to qualitative inquiry: grounded theory, case study, ethnography, phenomenology, narrative and autoethnography, participatory action research, and arts-based research Presents innovative qualitative data collection methods and modern representation strategies, such as virtual ethnography, photo-voice, and mobile interviewing *Qualitative Research Methods: Collecting Evidence, Crafting Analysis, Communicating Impact* is an ideal resource for undergraduate and graduate students, instructors, and faculty across multiple disciplines including the social sciences, healthcare, education, management, and the humanities, and for practitioners seeking expert guidance on practical qualitative methods. Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively . Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of*

Research explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, "So what?" Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources

Since 1994, Nancy Mulvany's *Indexing Books* has been the gold standard for thousands of professional indexers, editors, and authors. This long-awaited second edition, expanded and completely updated, will be equally revered. Like its predecessor, this edition of *Indexing Books* offers comprehensive, reliable treatment of indexing principles and practices relevant to authors and indexers alike. In addition to practical advice, the book presents a big-picture perspective on the nature and purpose of indexes and their role in published works. New to this edition are discussions of "information overload" and the role of the index, open-system versus closed-system indexing, electronic submission and display of indexes, and trends in software development, among other topics. Mulvany is equally comfortable focusing on the nuts and bolts of indexing—how to determine what is indexable, how to decide the depth of an index, and how to work with publisher instructions—and broadly surveying important sources of indexing guidelines such as *The Chicago Manual of Style*, Sun Microsystems, Oxford University Press, NISO TR03, and ISO 999. Authors will appreciate Mulvany's in-depth consideration of the costs and benefits of preparing one's own index versus hiring a professional, while professional indexers will value Mulvany's insights into computer-aided indexing. Helpful appendixes include resources for indexers, a worksheet for general index specifications, and a bibliography of sources to consult for further information on a range of topics. *Indexing Books* is both a practical guide and a manifesto about the vital role of the human-crafted index in the Information Age. As the standard indexing reference, it belongs on the shelves of everyone involved in writing and publishing nonfiction books.
